Power BI ❤️ Emo(ji)

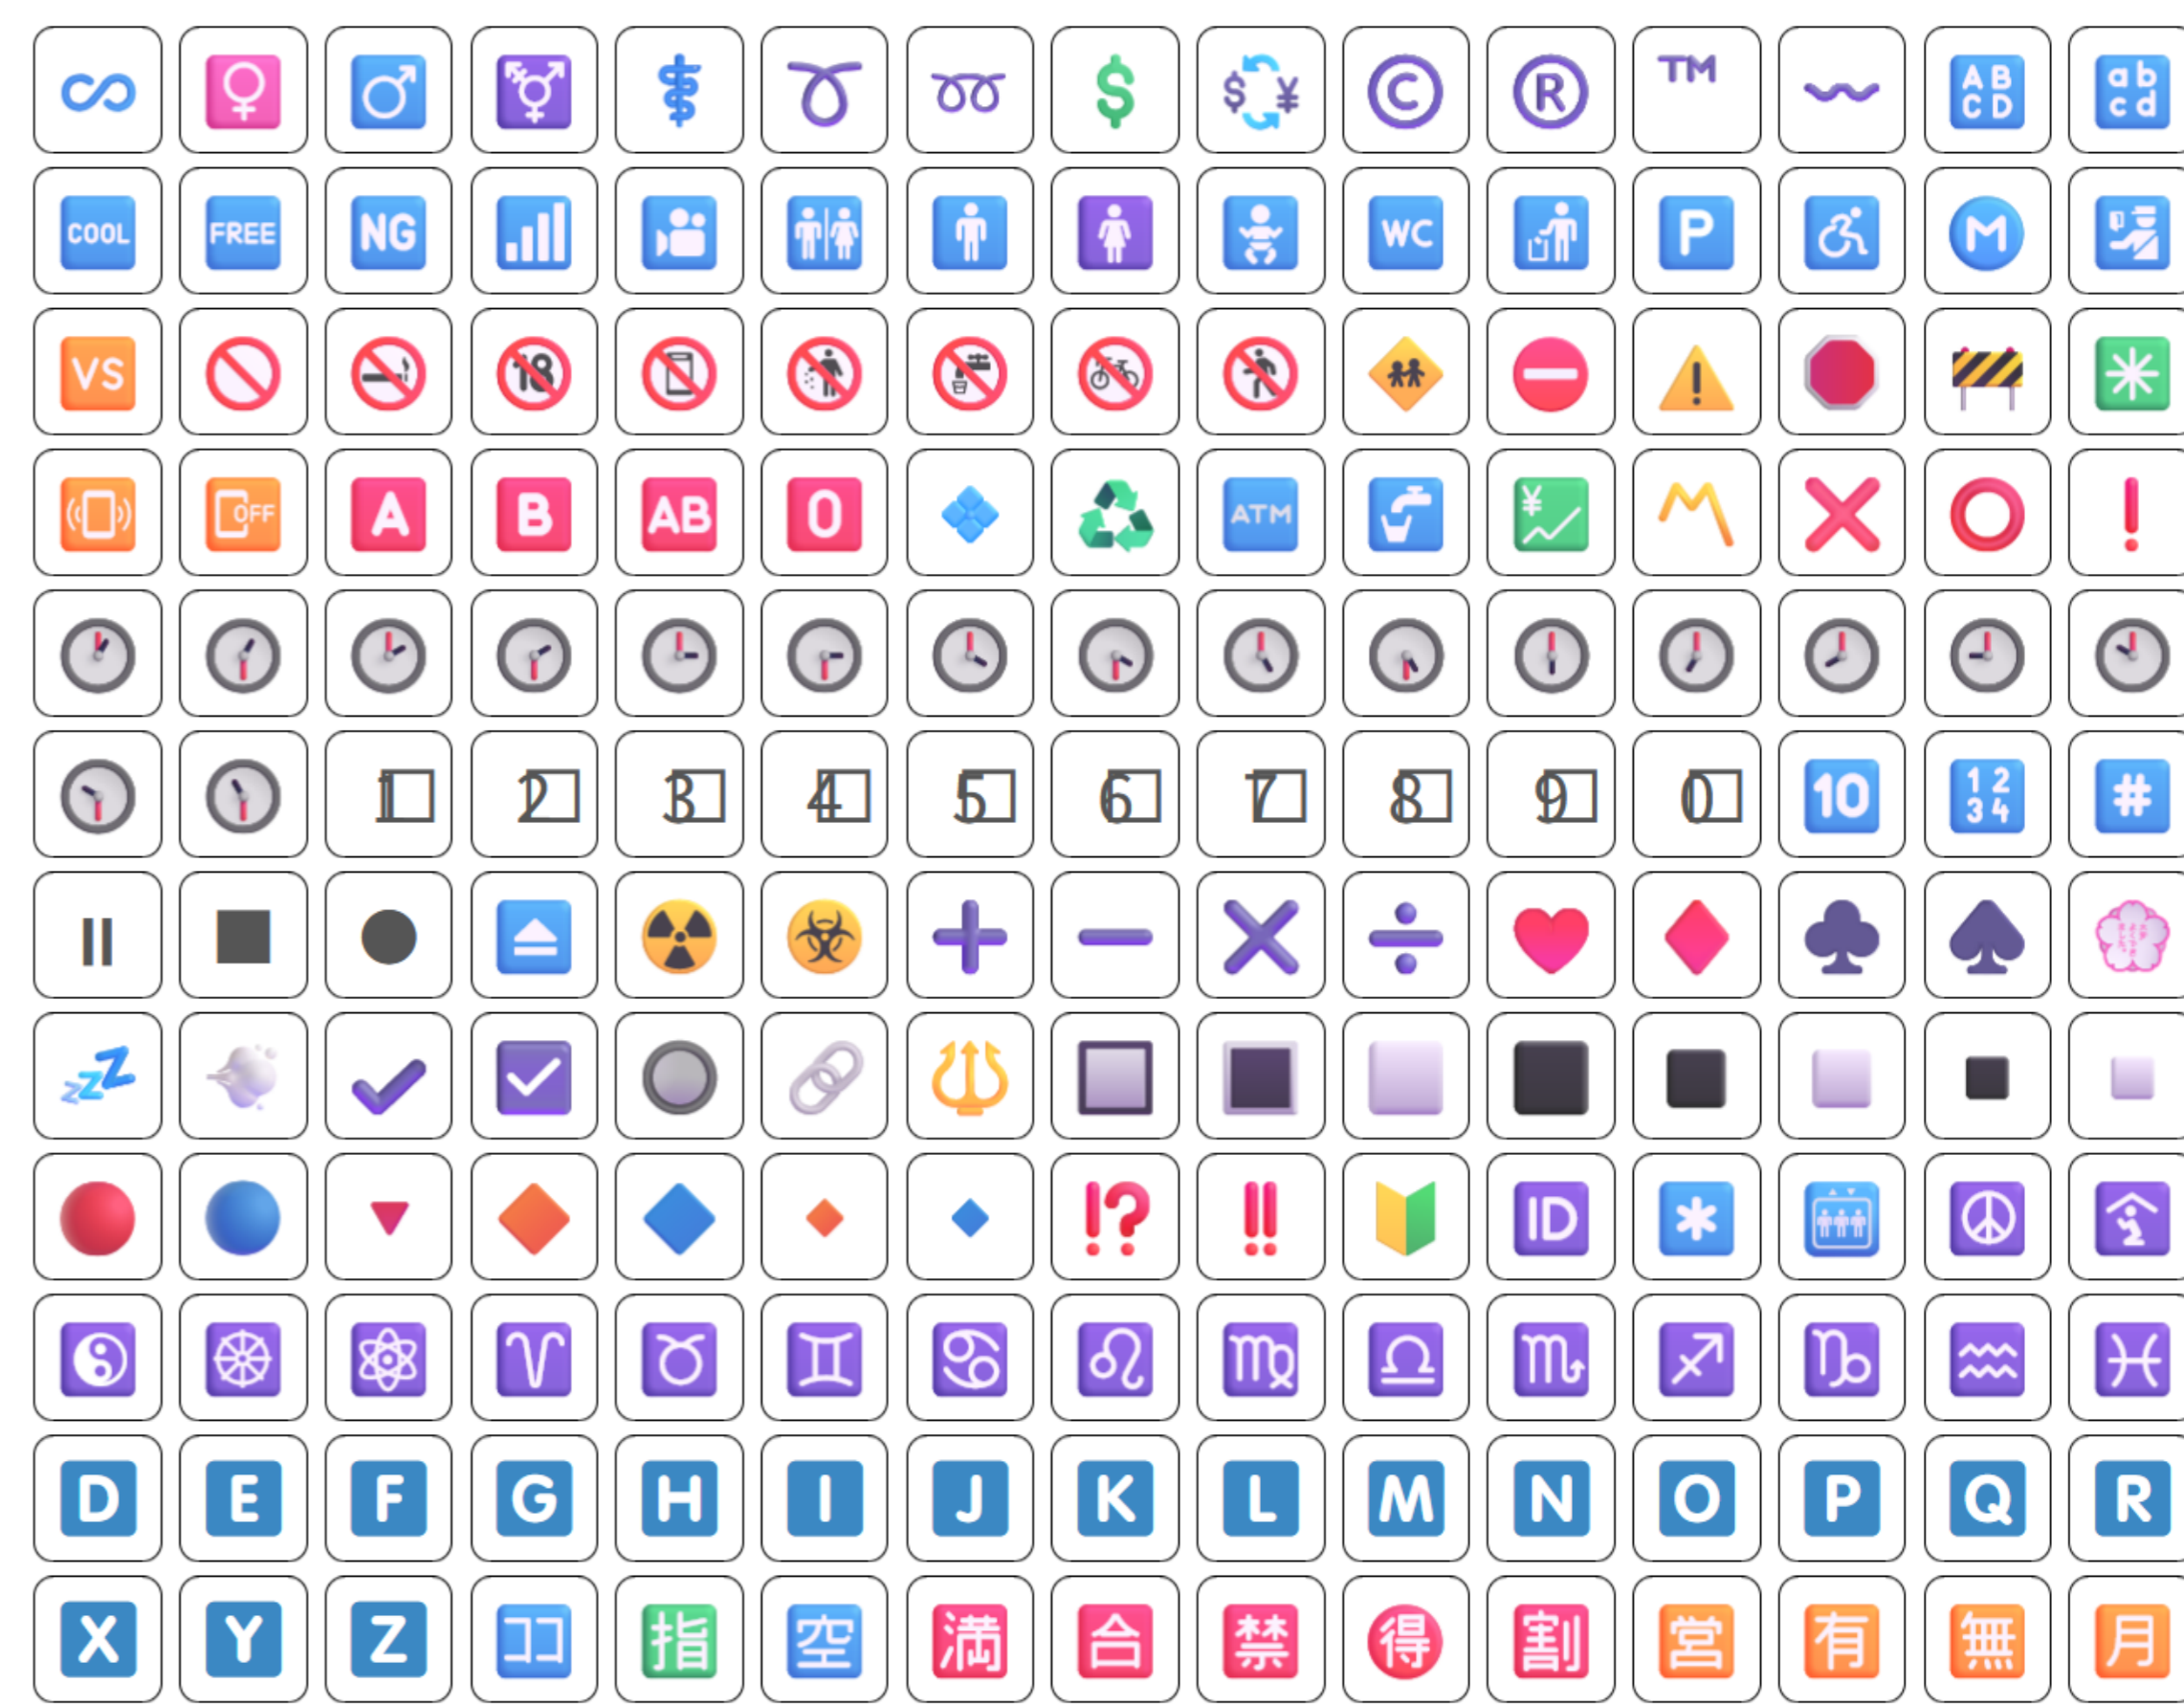

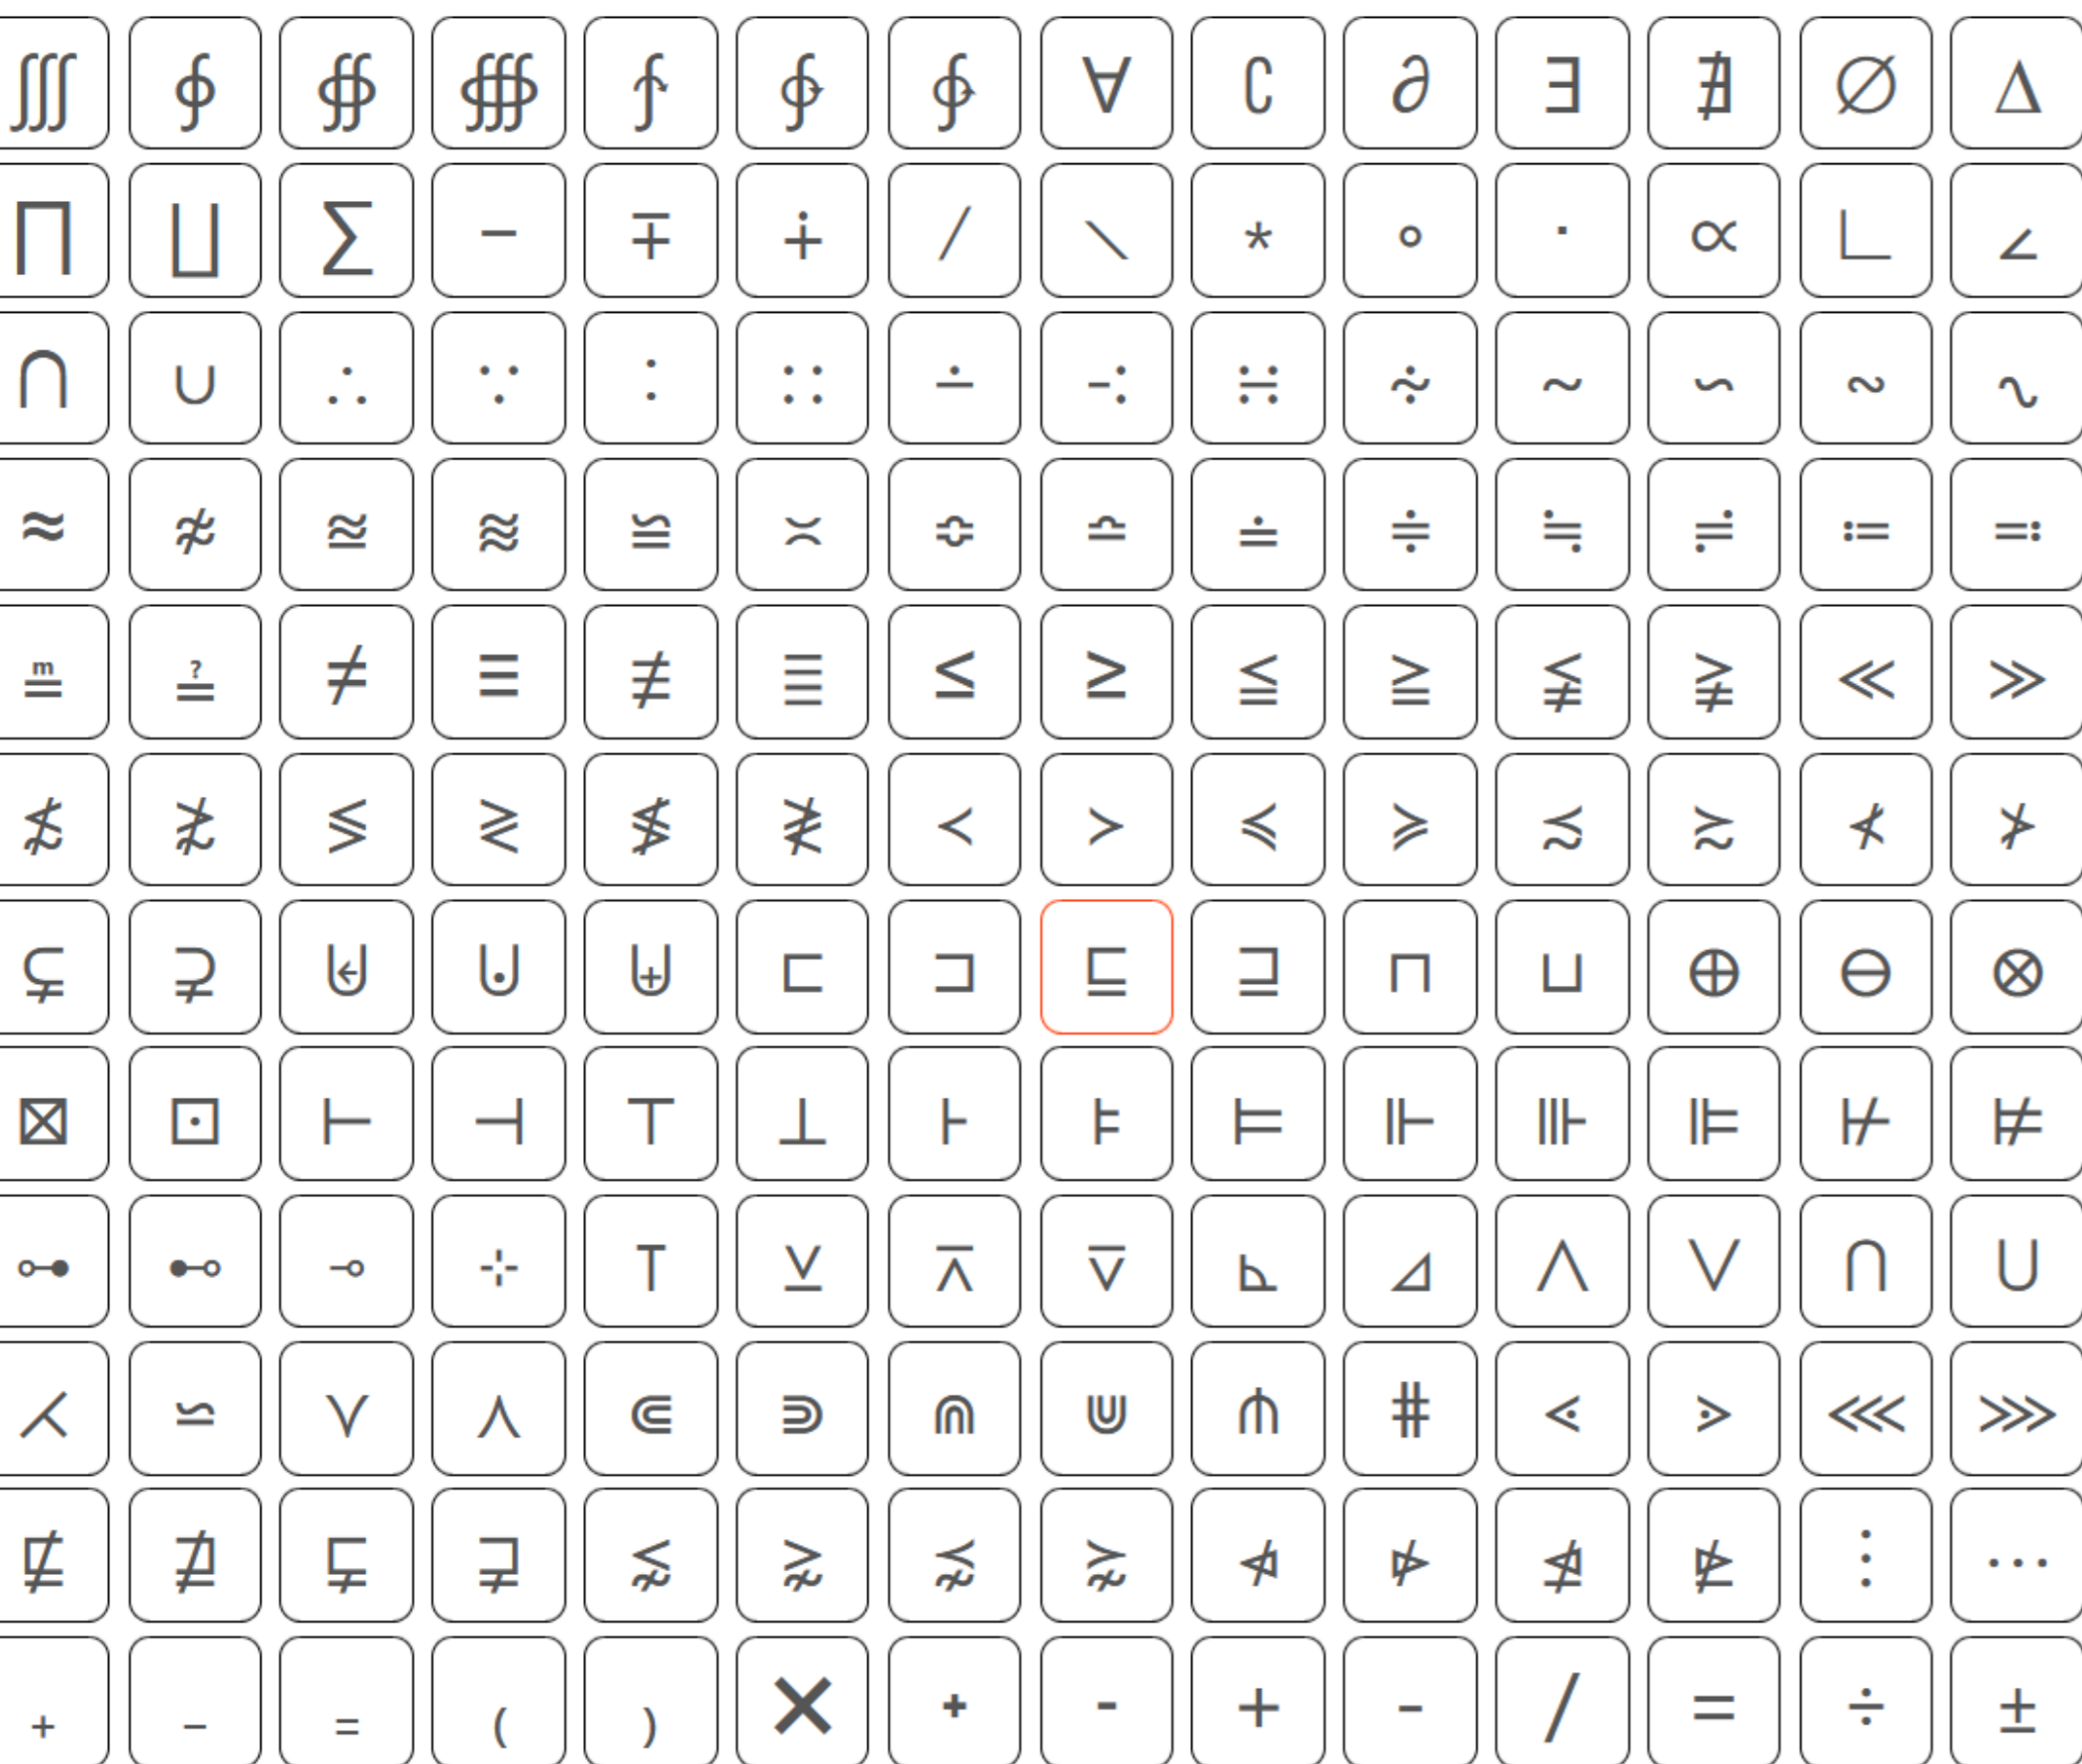

To increase usability of the **Microsoft** Power BI (Service) App i have something nice for you. Use an Emoji for your Name titles and the end user will immediately see that there is a folder with more content. Of course you can also use other emojis. Give it a try! Just some simple steps written in this document.

For this example is use fake data and part of the lovely brand **Van der Valk Business** (71 Hotels & Restaurants)

Last year i showed the world what a emoji can do with a menu style. This time i focus on symbols. Love it also!

Go to the website <https://coolsymbol.com> and look at all the amazing symbols you can use for your Power BI reports

Copy and paste the symbol from the website BEFORE the title of your page/tab inside your Power BI desktop file.

 Page title 

↳ Homepage

↳ Operations

↳ Terminal

↳ Trucking

↳ Intermodaal

↳ CAR

↳ Freight Management

↳ Rental

When you upload the report the workspace and put it into your APP you see the symbol when you open the report

You can also insert emoji symbols so a classic folder structure is amazing.
